Definition

Murals are pieces of artwork painted or applied to walls or other permanent surfaces. These can be applied in paint, spray paint, using brushes, stencils, wheatpaste, mosaic, or many other mediums. They are often large and within viewable public spaces.

There is an overlap between publicly available murals and graffiti. Murals can be legally applied (created with the permission of the owner or municipality) or illegally applied. Generally, illegally applied murals are often considered graffiti, whereas sponsored murals are portrayed or seen as art. The terms "Street Art" and "Urban Expressionism" are often used synonymously with graffiti, and any of these can be used in the creation of murals.

CONSTRUCTION!!!

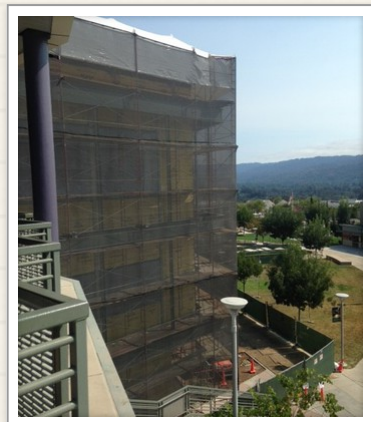

You may have noticed that the library is looking a little wrapped up. Workers will be doing repairs all throughout building 9 this semester. You may hear more noise and some areas, like the group study rooms, will be temporarily unavailable. We have ear plugs available to use and students can use the Social Science HUB (located behind the library's front desk) as a study space when it is free.
